# What to Expect from This Module

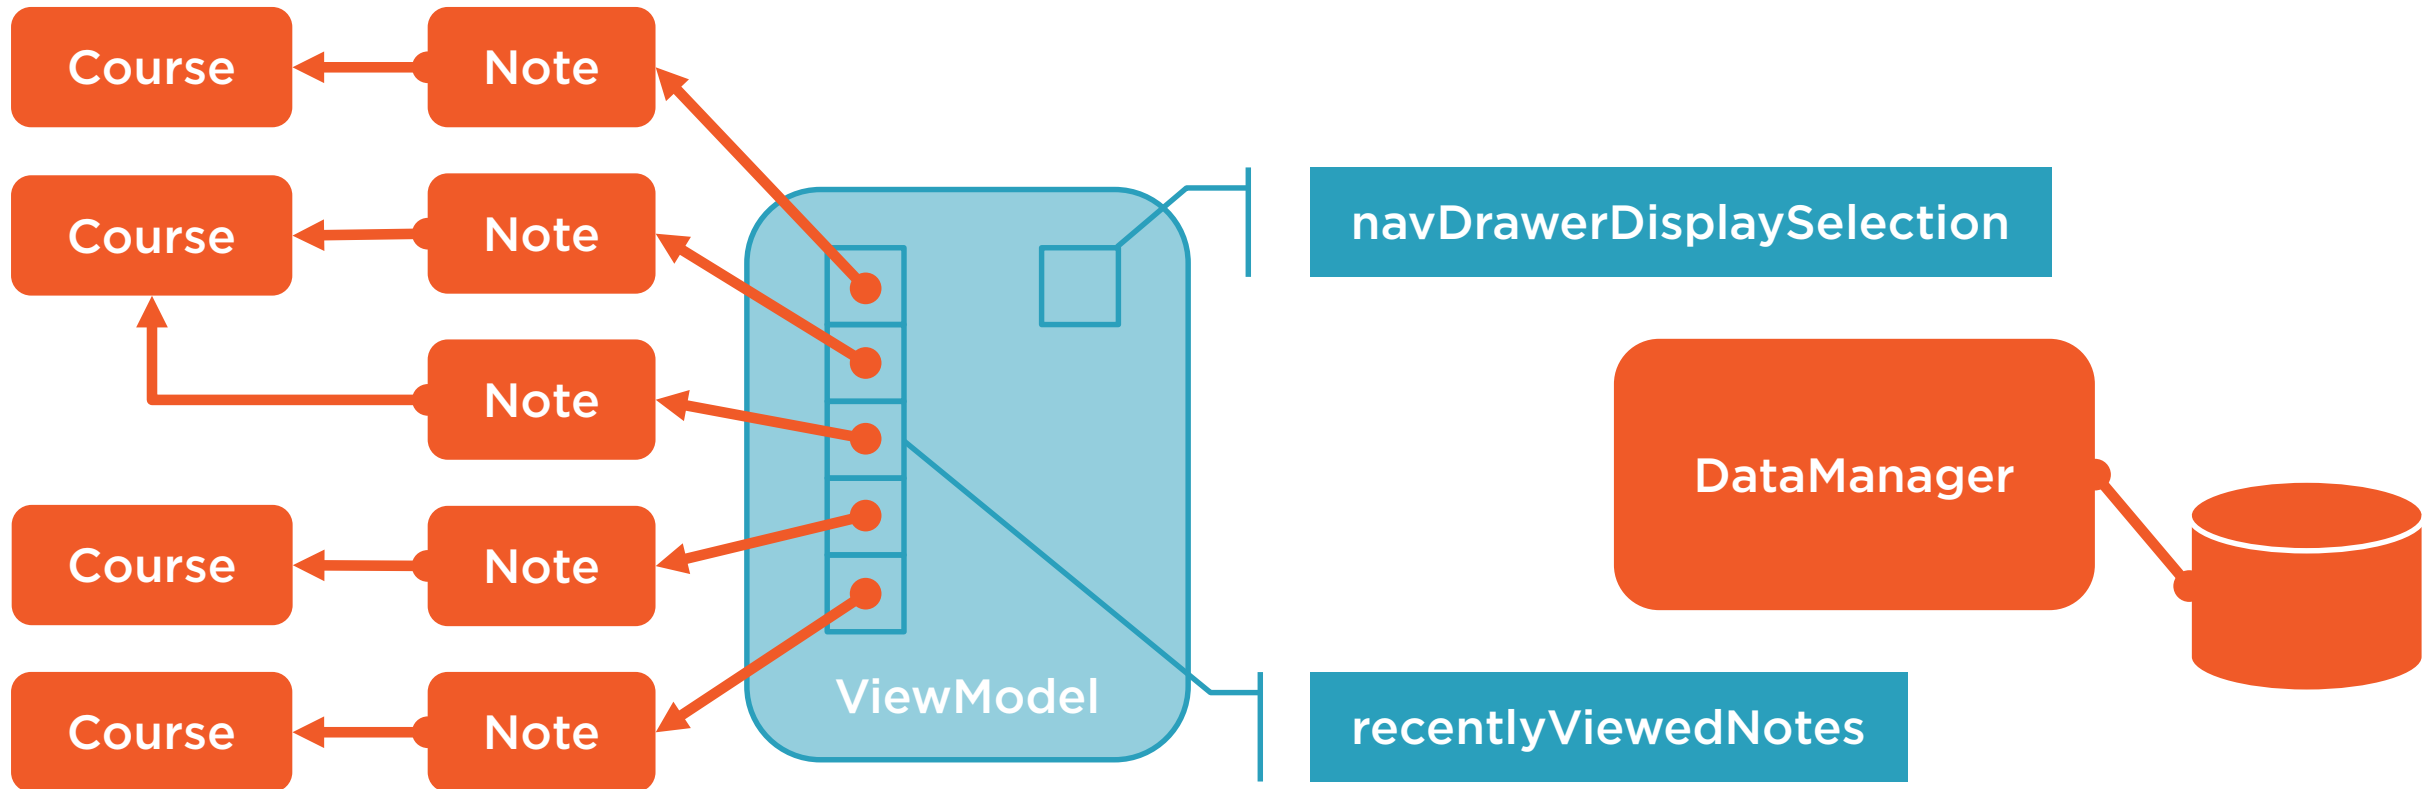

Check on how we're doing with activity state

Relationship between app data and state

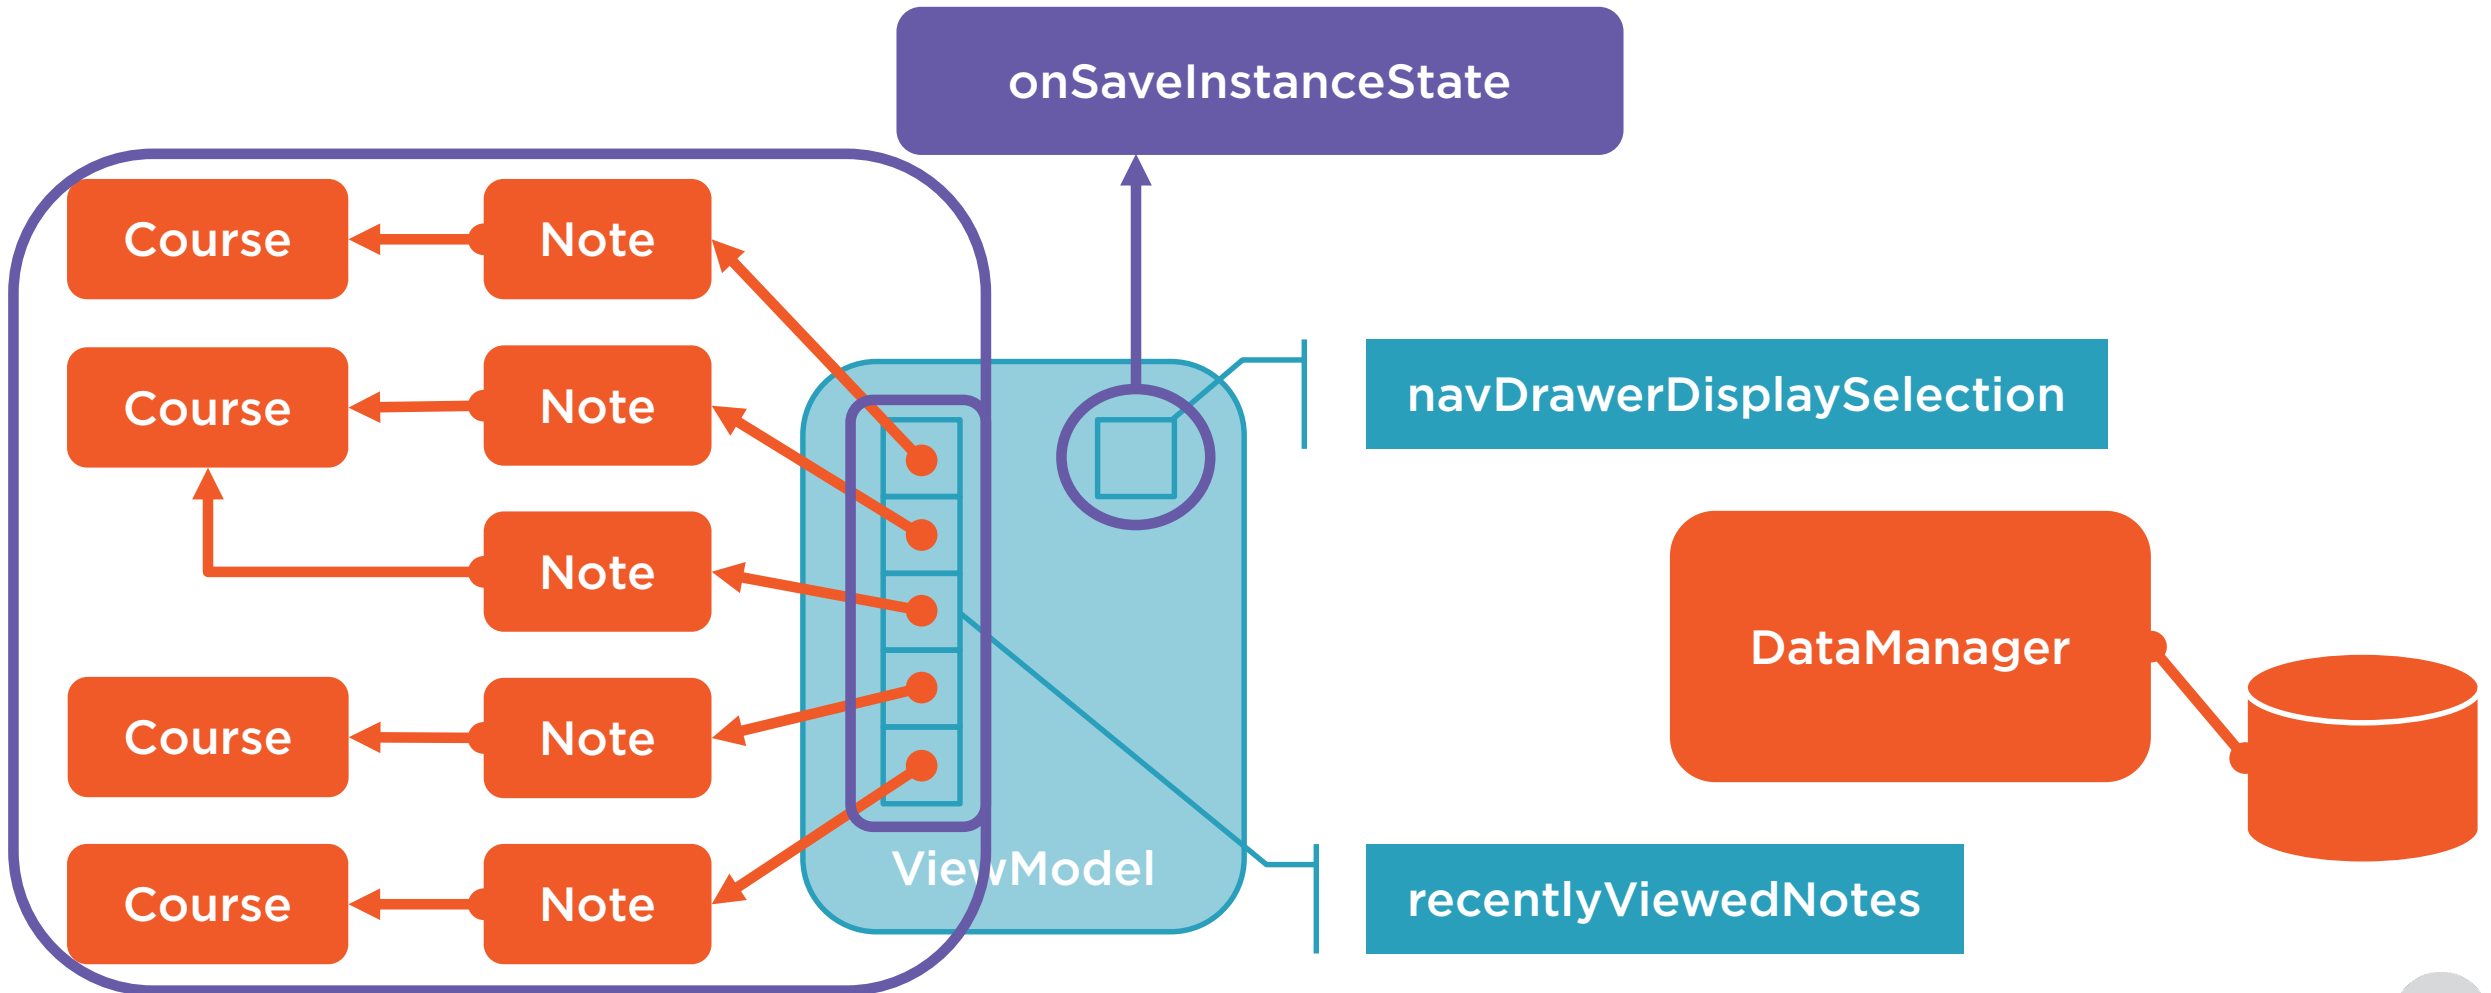

Persisting state of an object graph

Using ViewModel and durable state together

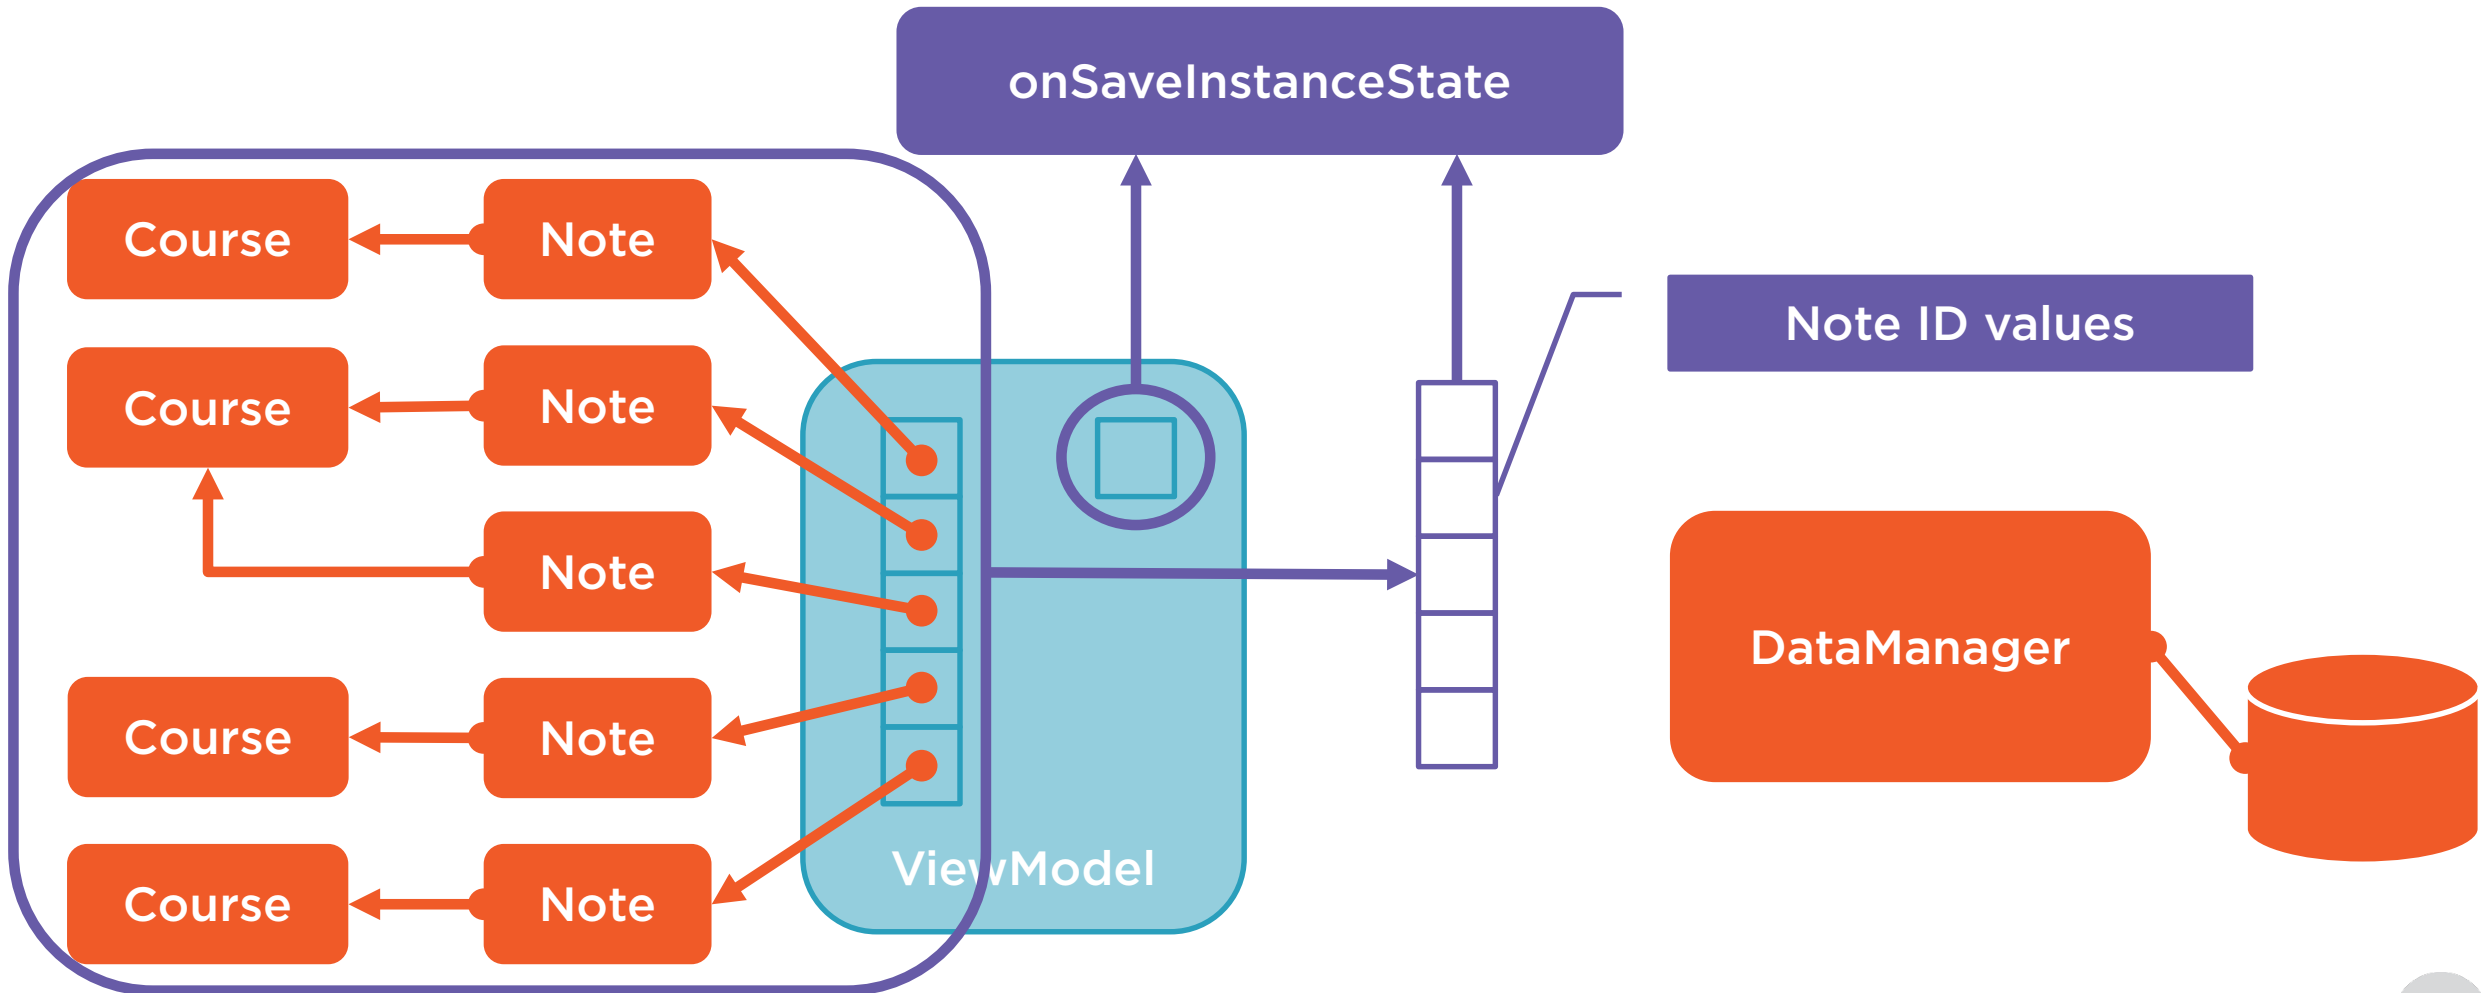

# Our App's Data and State

# Our App's Data and State

# Our App's Data and State

# Summary

## **Saving complex state**

- Avoid writing state directly to bundle

## **Cooperate with app data store**

- Save to bundle just what's necessary to reconstruct state

## **Use a two-part state mgmt. approach**

- ViewModel
- Durable state
